

SUGGESTED INTERVIEW QUESTIONS

for **Sherry Boschert**, author of
PLUG-IN HYBRIDS: THE CARS THAT WILL RECHARGE AMERICA
(New Society Publishers)

- 1) What is a plug-in hybrid? How is that different from other hybrids?
- 2) Why would anyone want to plug in a car?
- 3) Where can consumers get plug-in hybrids?
- 4) Regular hybrids are expensive. Will plug-in hybrids be even more expensive?
- 5) Won't the electrical grid crash if everyone starts plugging in their cars?
- 6) How can plug-in hybrids be better for the environment if the power plants that make electricity pollute?
- 7) Why are environmentalists and neoconservatives both advocating for plug-in hybrids?
- 8) The recent documentary *Who Killed the Electric Car?* (Sony Pictures Classics) suggests that plug-in cars are dead. Are they?
- 9) Willie Nelson backs biodiesel, T. Boone Pickens picks natural gas cars, the corn growers of America support driving on ethanol, and some people still hype hydrogen fuel-cell vehicles. How do plug-in hybrids stack up against these other alternatives to gasoline?
- 10) Which company will come out with a plug-in hybrid first?
